ENERGY

A BETTER WAY TO **POWER** YOUR BUSINESS

SHELL ENERGY PHILIPPINES

Your reliable partner for cleaner, flexible,
and innovative energy solutions.

YOUR TRUSTED ENERGY PARTNER

The energy market is transitioning, driven by growing energy demand and an urgent need to curb emissions. Attitudes are changing and customer needs are quickly evolving. As a leading global provider of energy products and services, Shell Energy offers a better way to power your business.

Leveraging our world-class trading, production and supply networks, we offer reliable, integrated and innovative energy solutions across a portfolio of natural gas, power and environmental products. Powering businesses in North America and Europe for decades, we are now building scale in other markets and delivering energy products and services tailored to meet your unique requirements.

~18 TWh

electricity sold
annually to Australian
businesses

**5,000+
MW**

managed renewable
power capacity
globally including
wind, hydro and solar

**10 BILLION
CUBIC FEET**

of gas sold every
day in North America

20+

forestation and conservation projects supplying a global portfolio of nature-based offsets

Delivering enough liquefied natural gas (LNG) to power over

**100
MILLION**

homes for a full year

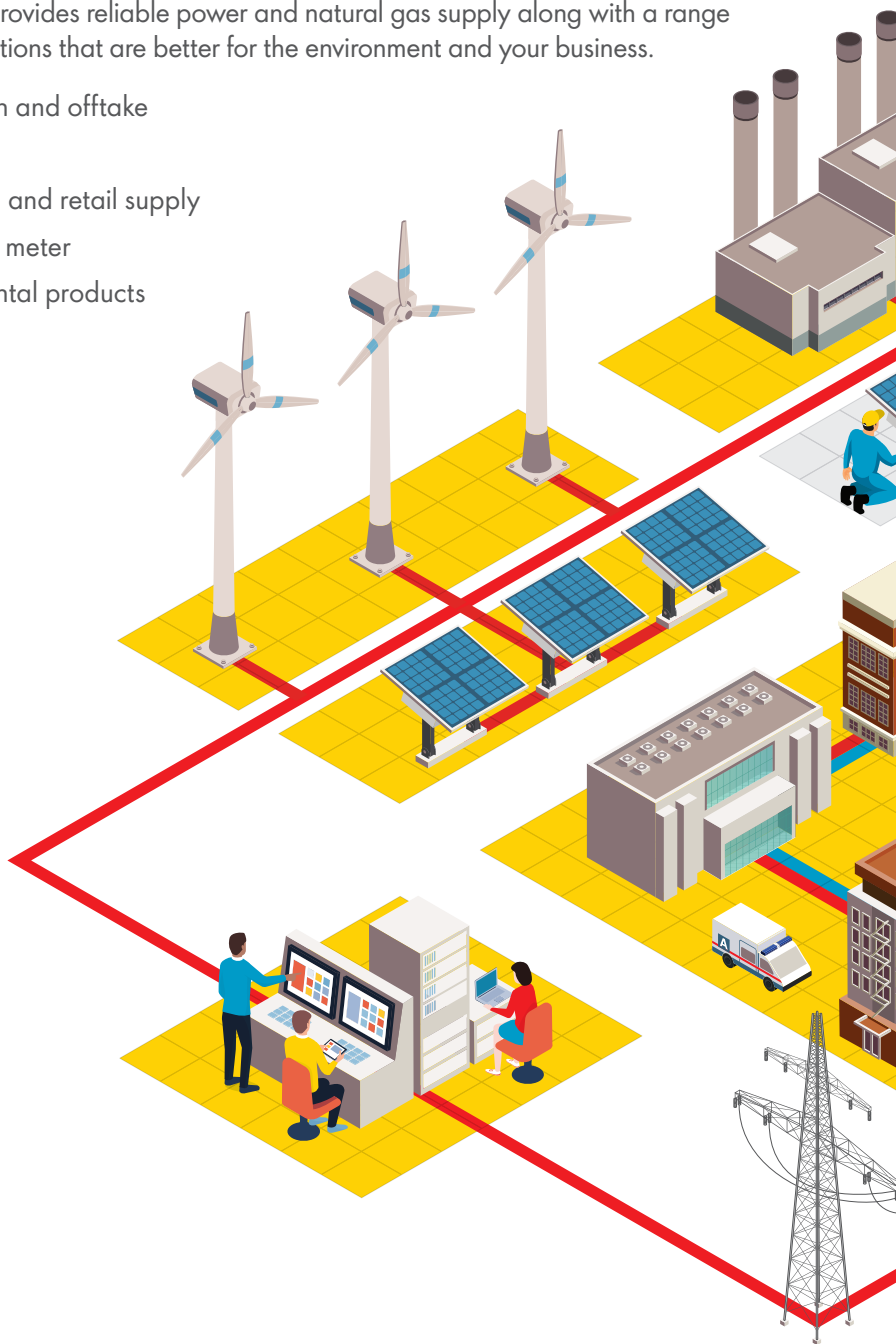

**11,000 +
MW**

managed power generation capacity globally

PROVIDING SOLUTIONS ACROSS THE ENERGY SUPPLY CHAIN

Shell Energy provides reliable power and natural gas supply along with a range of carbon solutions that are better for the environment and your business.

- Generation and offtake
- Trading
- Wholesale and retail supply
- Behind the meter
- Environmental products

REPUTABLE BRAND

We are part of the Shell Companies in the Philippines, a trusted energy partner that has been powering the country's progress for over a century. With a solid financial profile and credit rating, we can help you mitigate risks and plan for the future.

GLOBAL EXPERTISE

We have decades of experience managing cross-commodity solutions with established trading desks and technology hubs in Europe, US, and other markets. Combining global expertise with our local knowledge, we are excited to enter the Philippines electricity market and help meet customers changing energy requirements.

COMMITMENT TO A SUSTAINABLE ENERGY FUTURE

We aim to be a net-zero emissions energy business by 2050. We are also committed to supporting our customers with cleaner energy solutions to help them lower their net emissions. Choose our renewable electricity offering and range of environmental products to lower your business's emission footprint. We also offer energy-saving solutions on your side of the meter to reduce costs and carbon.
